Base, for glasses wearers · cut 1 from 6 mm EVA

Worn BEHIND the glasses. Drawn for a frame 140 mm wide; see the fit table to resize.

Paper fit first: cut this page on the solid line, hold it to your face, put your glasses on over it.
· The band lies flat on your forehead and the frame's top bar sits along its lower edge.
· The nose strip drops between the nose pads; the pads still touch skin.
· Each cheek tab sits outside the frame; the arms pass over the tabs.
Fold on the centre line to cut both halves at once.

Frame width → print scale for THIS page only

125 mm	130 mm	135 mm	140 mm	145 mm	150 mm
89%	93%	97%	100%	104%	107%

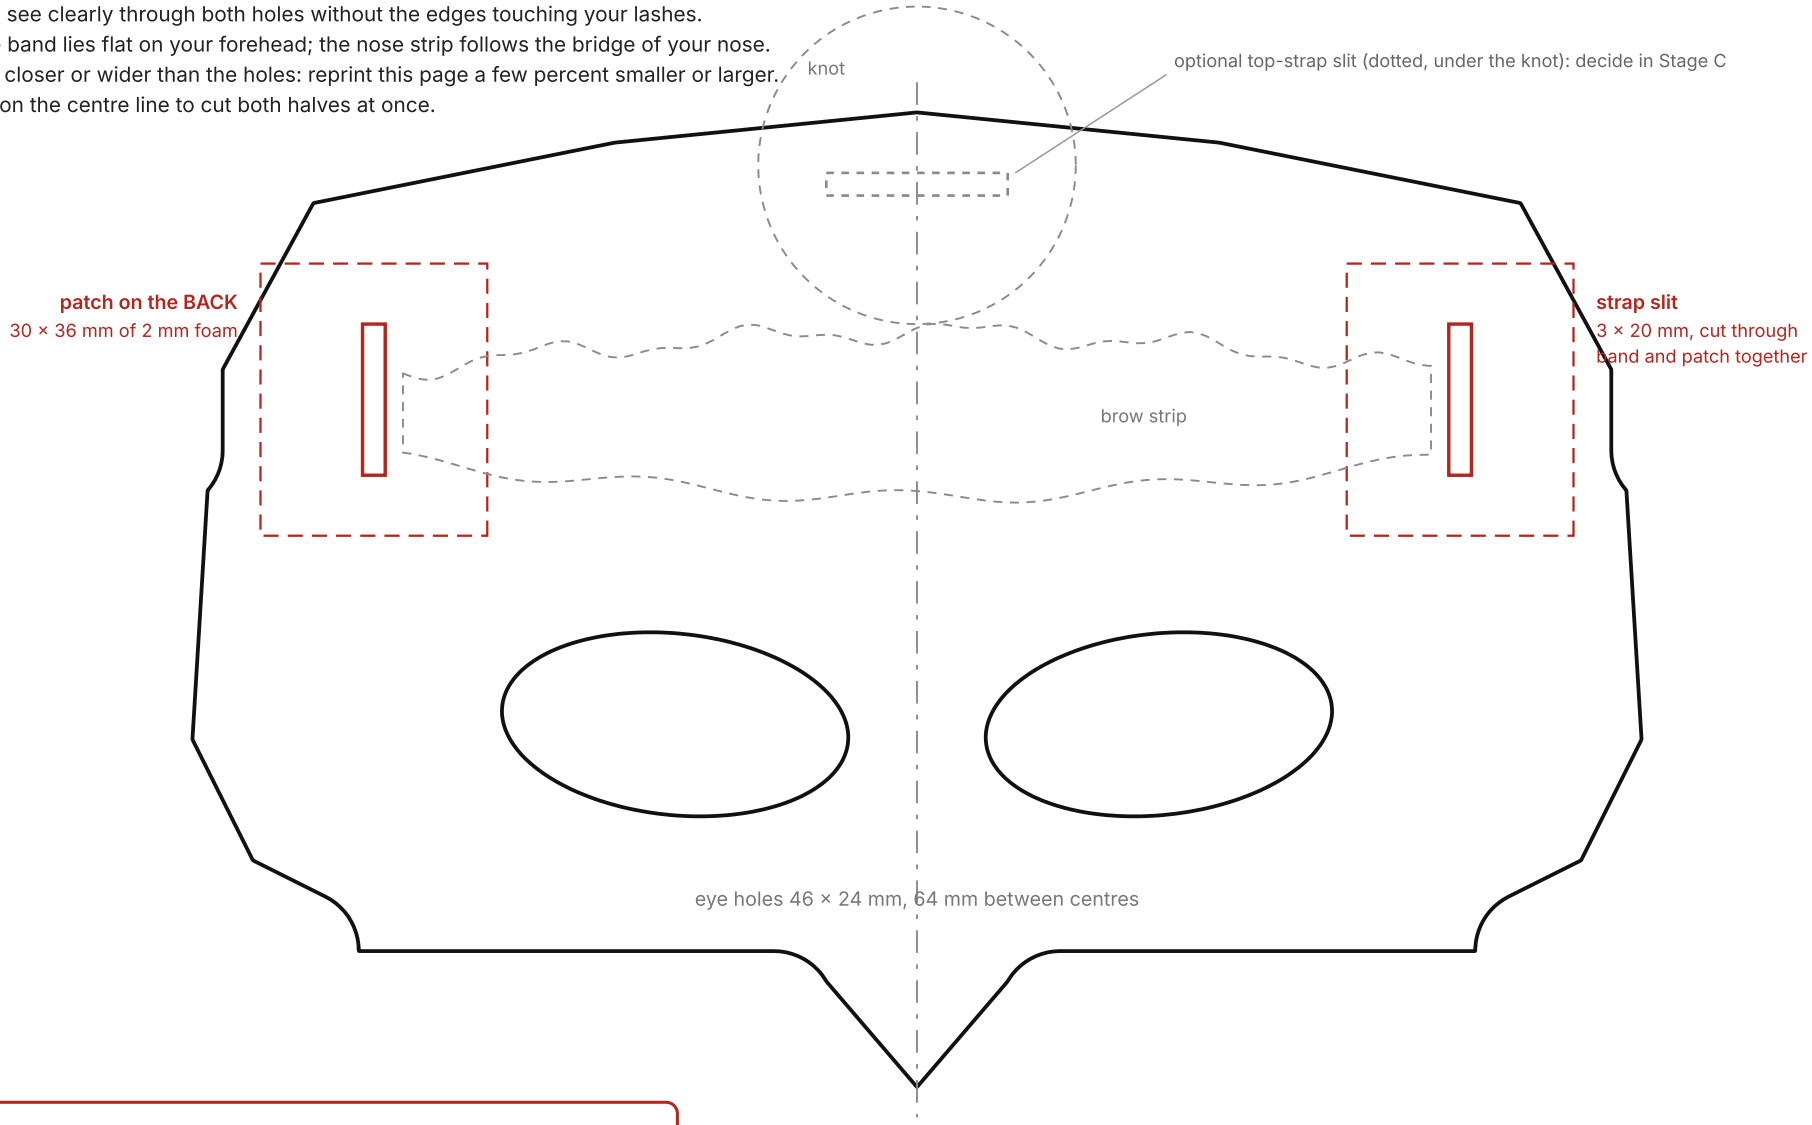

Scale brow_strip.stl by the same percentage. Leaf pages always print at 100%.

100 mm. Measure this bar after printing. Print at 100% / actual size, never "fit to page".

Base, no glasses · cut 1 from 6 mm EVA

Same band, nose and cheeks as the glasses base, joined under the eyes.

Paper fit first: cut the outline and both eye holes from paper and hold it to your face.
· You see clearly through both holes without the edges touching your lashes.
· The band lies flat on your forehead; the nose strip follows the bridge of your nose.
Eyes closer or wider than the holes: reprint this page a few percent smaller or larger.
Fold on the centre line to cut both halves at once.

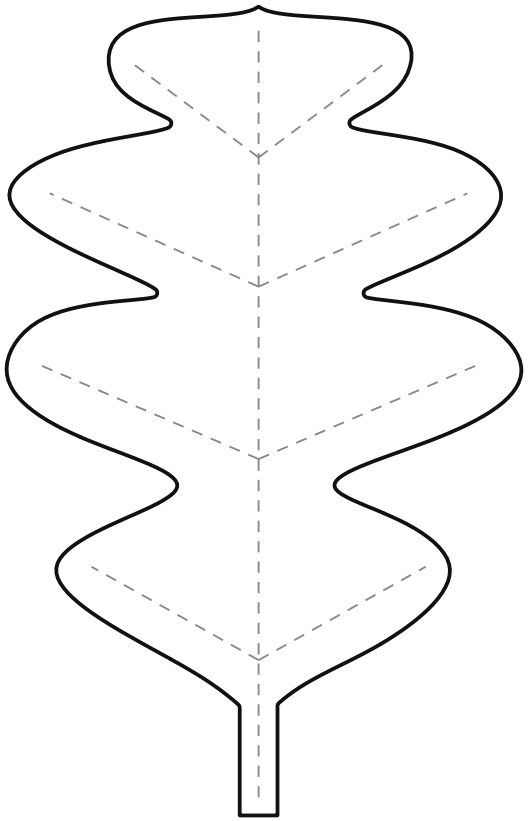

UNTESTED VARIANT

Drawn from the glasses base but never built. Paper-fit before cutting foam.

100 mm. Measure this bar after printing. Print at 100% / actual size, never “fit to page”.

Large oak leaf, 95 mm · cut 7 from 2 mm EVA

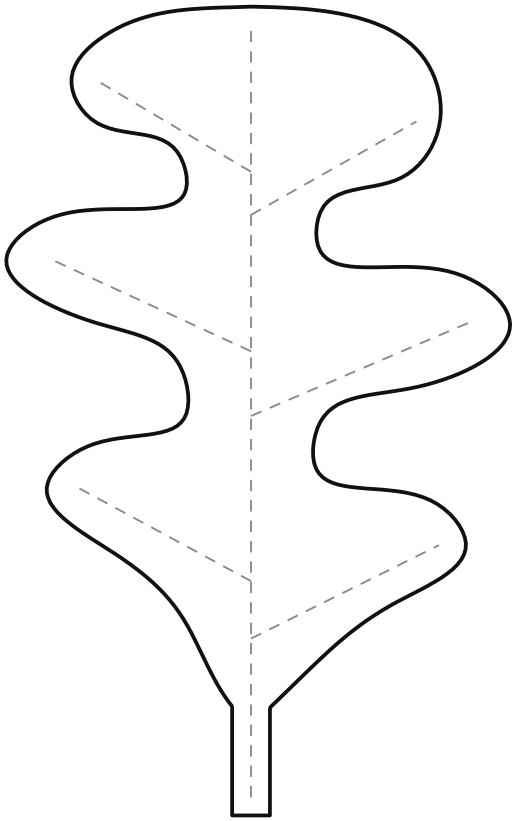

Tick a box for each one you cut. These counts are everything the mask uses: nothing is left over.

Large A

cut 3

☐☐☐

Large B

cut 4

☐☐☐☐

Large leaves make the tall back of the crown.

Print on card stock, cut the two shapes out, trace onto 2 mm foam. Turn the card over for every other leaf, so they are not all identical.

Dashed lines: where the veins go (stamp or score them later).

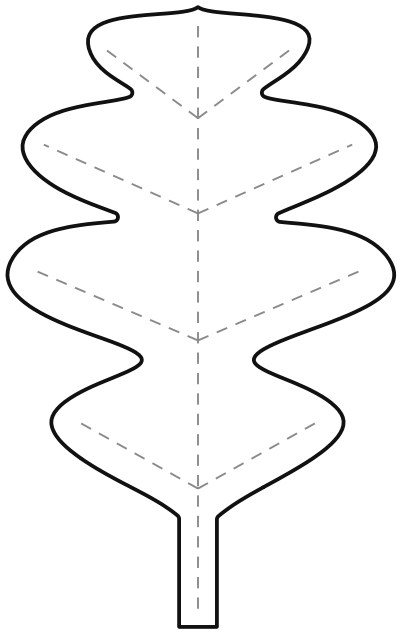

The stem is part of the leaf. Do not cut it off.

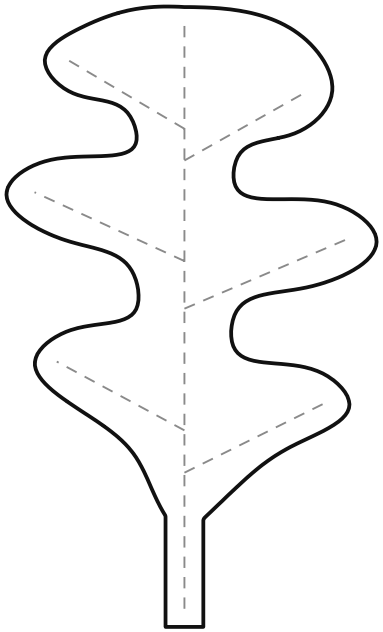

100 mm. Measure this bar after printing. Print at 100% / actual size, never “fit to page”.

Medium, small and tip leaves · cut 9 + 7 + 4 from 2 mm EVA, plus 2 strap patches

Counts include 1 medium, 2 small as spares. Keep the spares unsealed and unpainted: they are your repair kit.
Medium: 6 for the front row of the crown, 2 for the cheeks. Small: 4 for the cheeks, 1 for the nose. Tip: one on the end of each tendril.

100 mm. Measure this bar after printing. Print at 100% / actual size, never “fit to page”.
